

I am asking that you and respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that you demand and deserve. I am a driver and travel many miles in my car to several of the markets that provide the local traffic reports and a constant basis. In addition to the local traffic I recieve the local weather and just yesterday I was able to keep track of my home area of St. Louis and listened to the Tornado warnings and keeping up to date of my family in St. louis while I was in Chicago. If this service was not available, I could not hear the local reports resulting in me being distracted and worried.
